Prototype 이해하기

💡 Prototype란 무엇인가?!

Prototype Object

Prototype Link

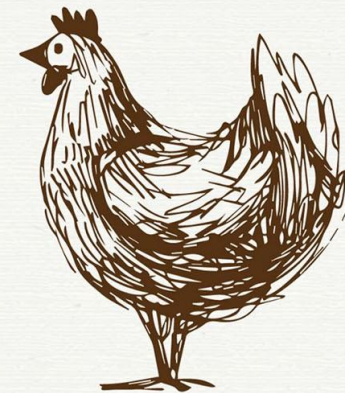

Constructor

Prototype Chain

```
function FOO () { ... };  
var foo = new FOO();
```

FOO.prototype

foo.__proto__

1. Prototype Object?

☒ 부모 객체

2. Prototype Link?

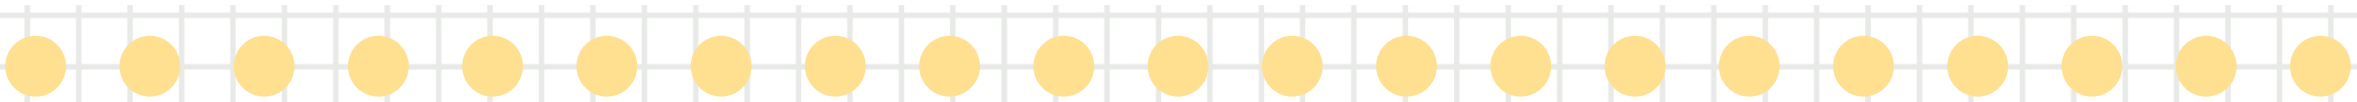

- ☒ `[[Prototype]]`
- ☒ `--proto--`

3. Constructor 프로퍼티?

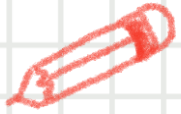

☒ 생성자

4. Prototype Chain?

☒ click

실습

```
function Person(name) {  
  this.name = name || '이름'  
}
```

```
Person.prototype.getName = function(){  
  retur this.name;  
}
```

```
function Korean(name){}
```

```
Korean.prototype = new Person();
```

```
let kor1 = new Korean();  
let kor2 = new Korean('철수');
```
